

**Q-Q Plot: DownTime\_imputed**  
**(n=5000 sample, original scale)**

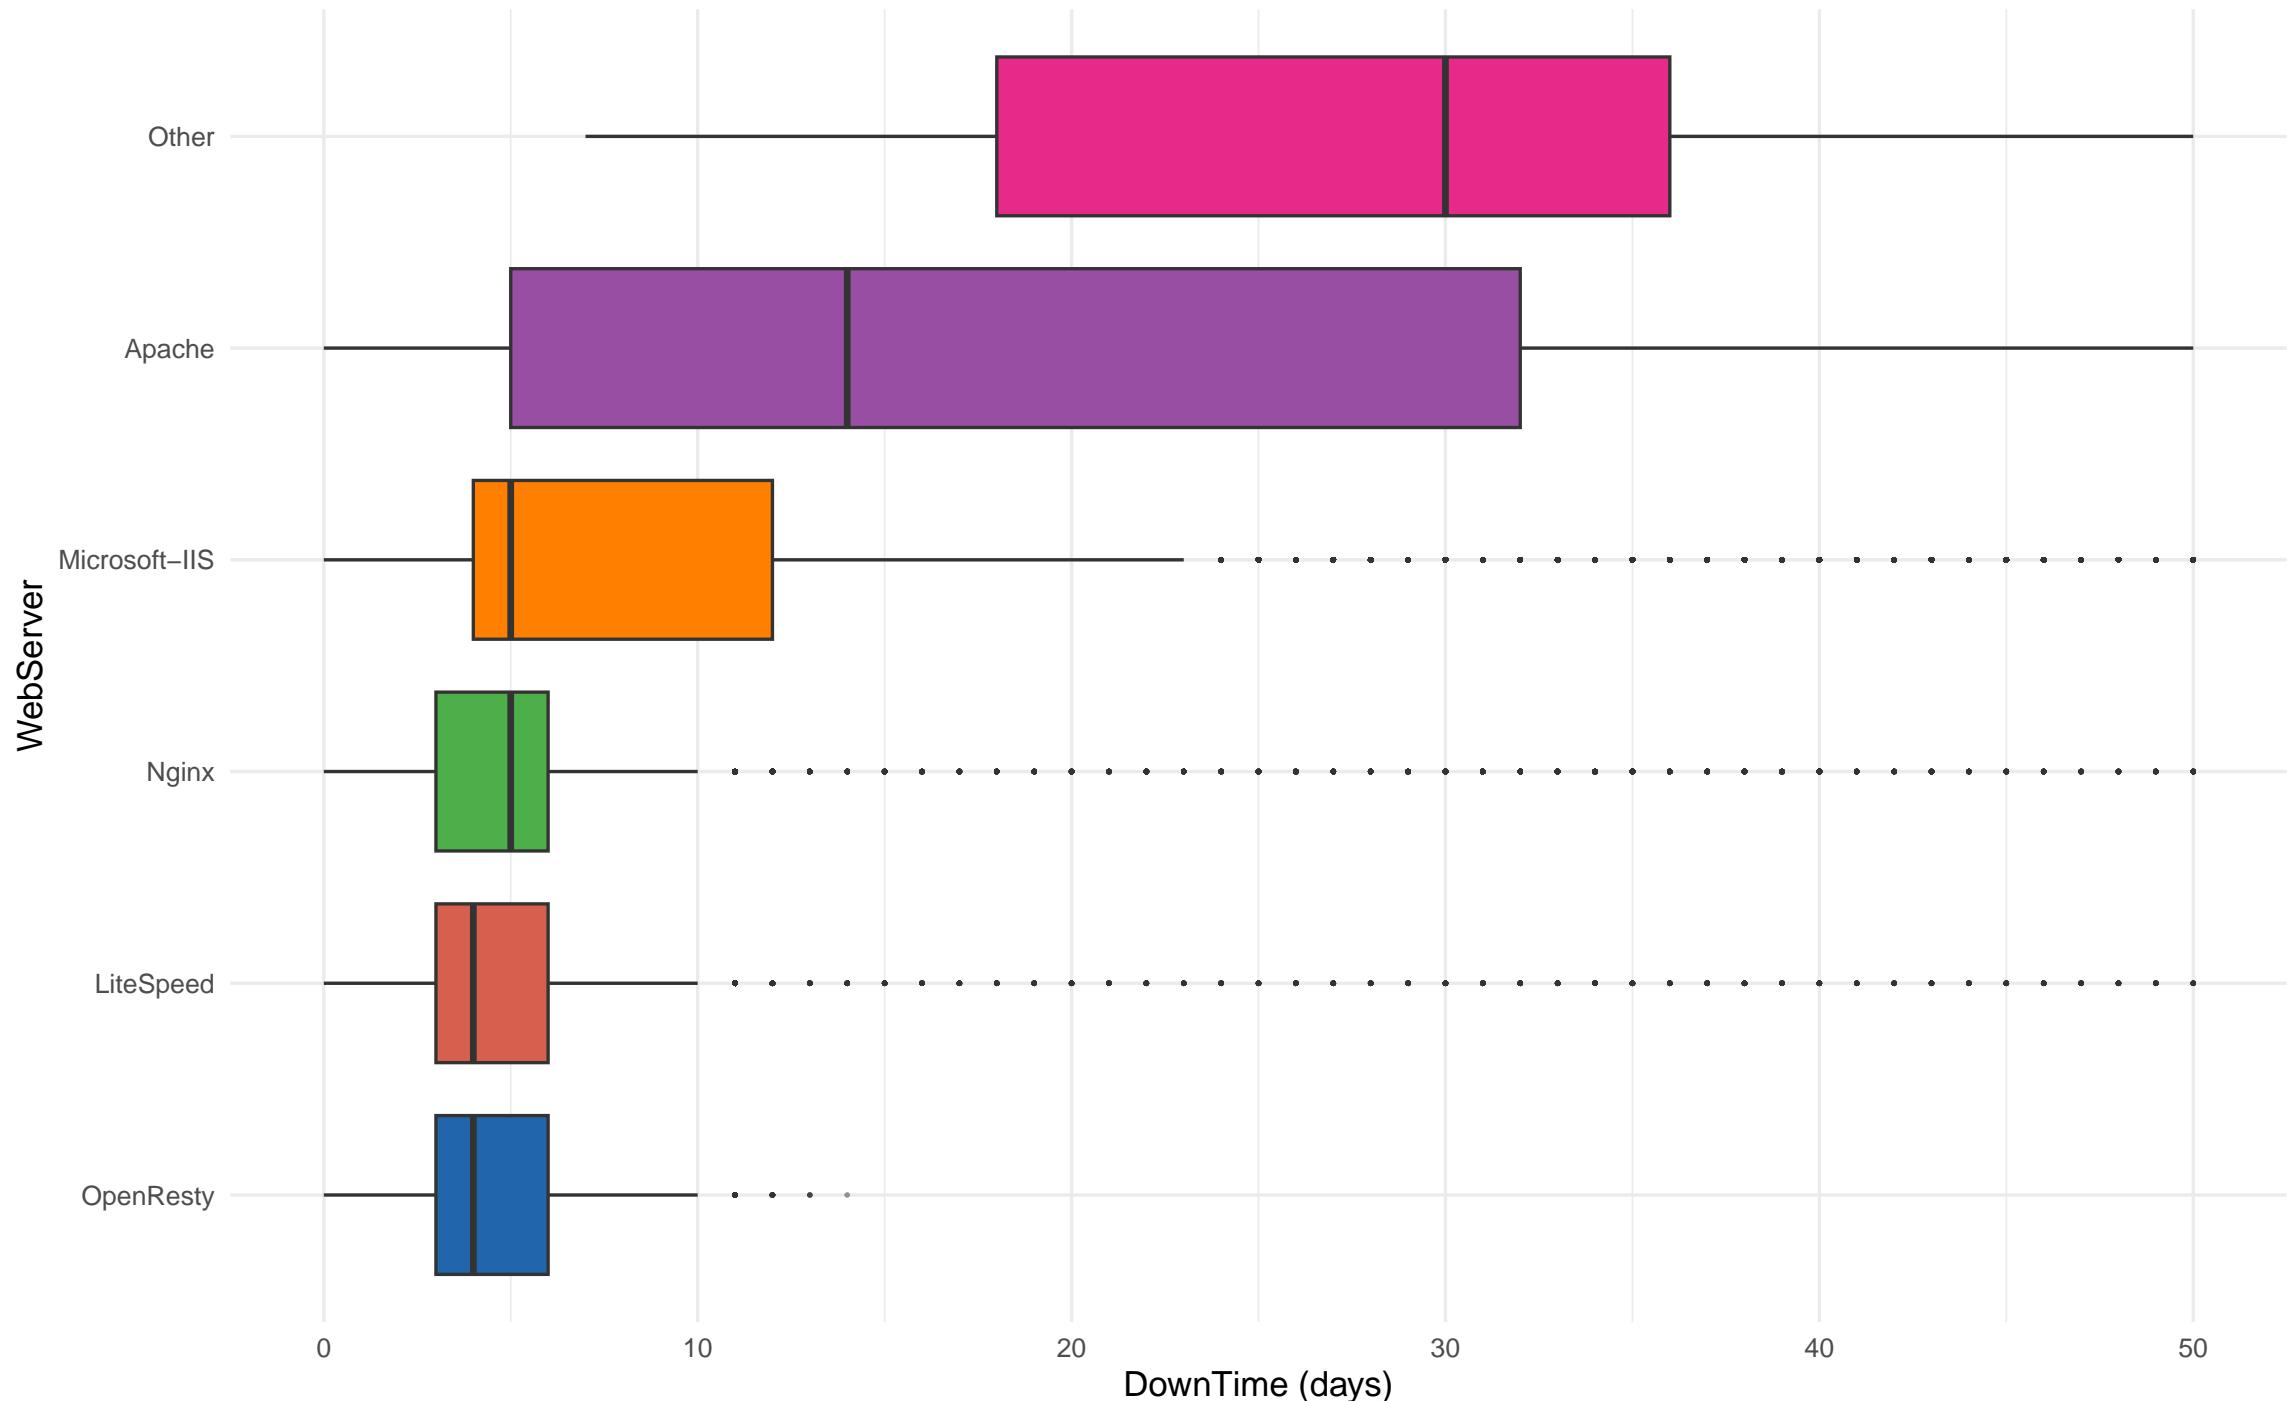

**Q-Q Plot: DownTime\_log\_imputed**  
**(n=5000 sample, log scale)**

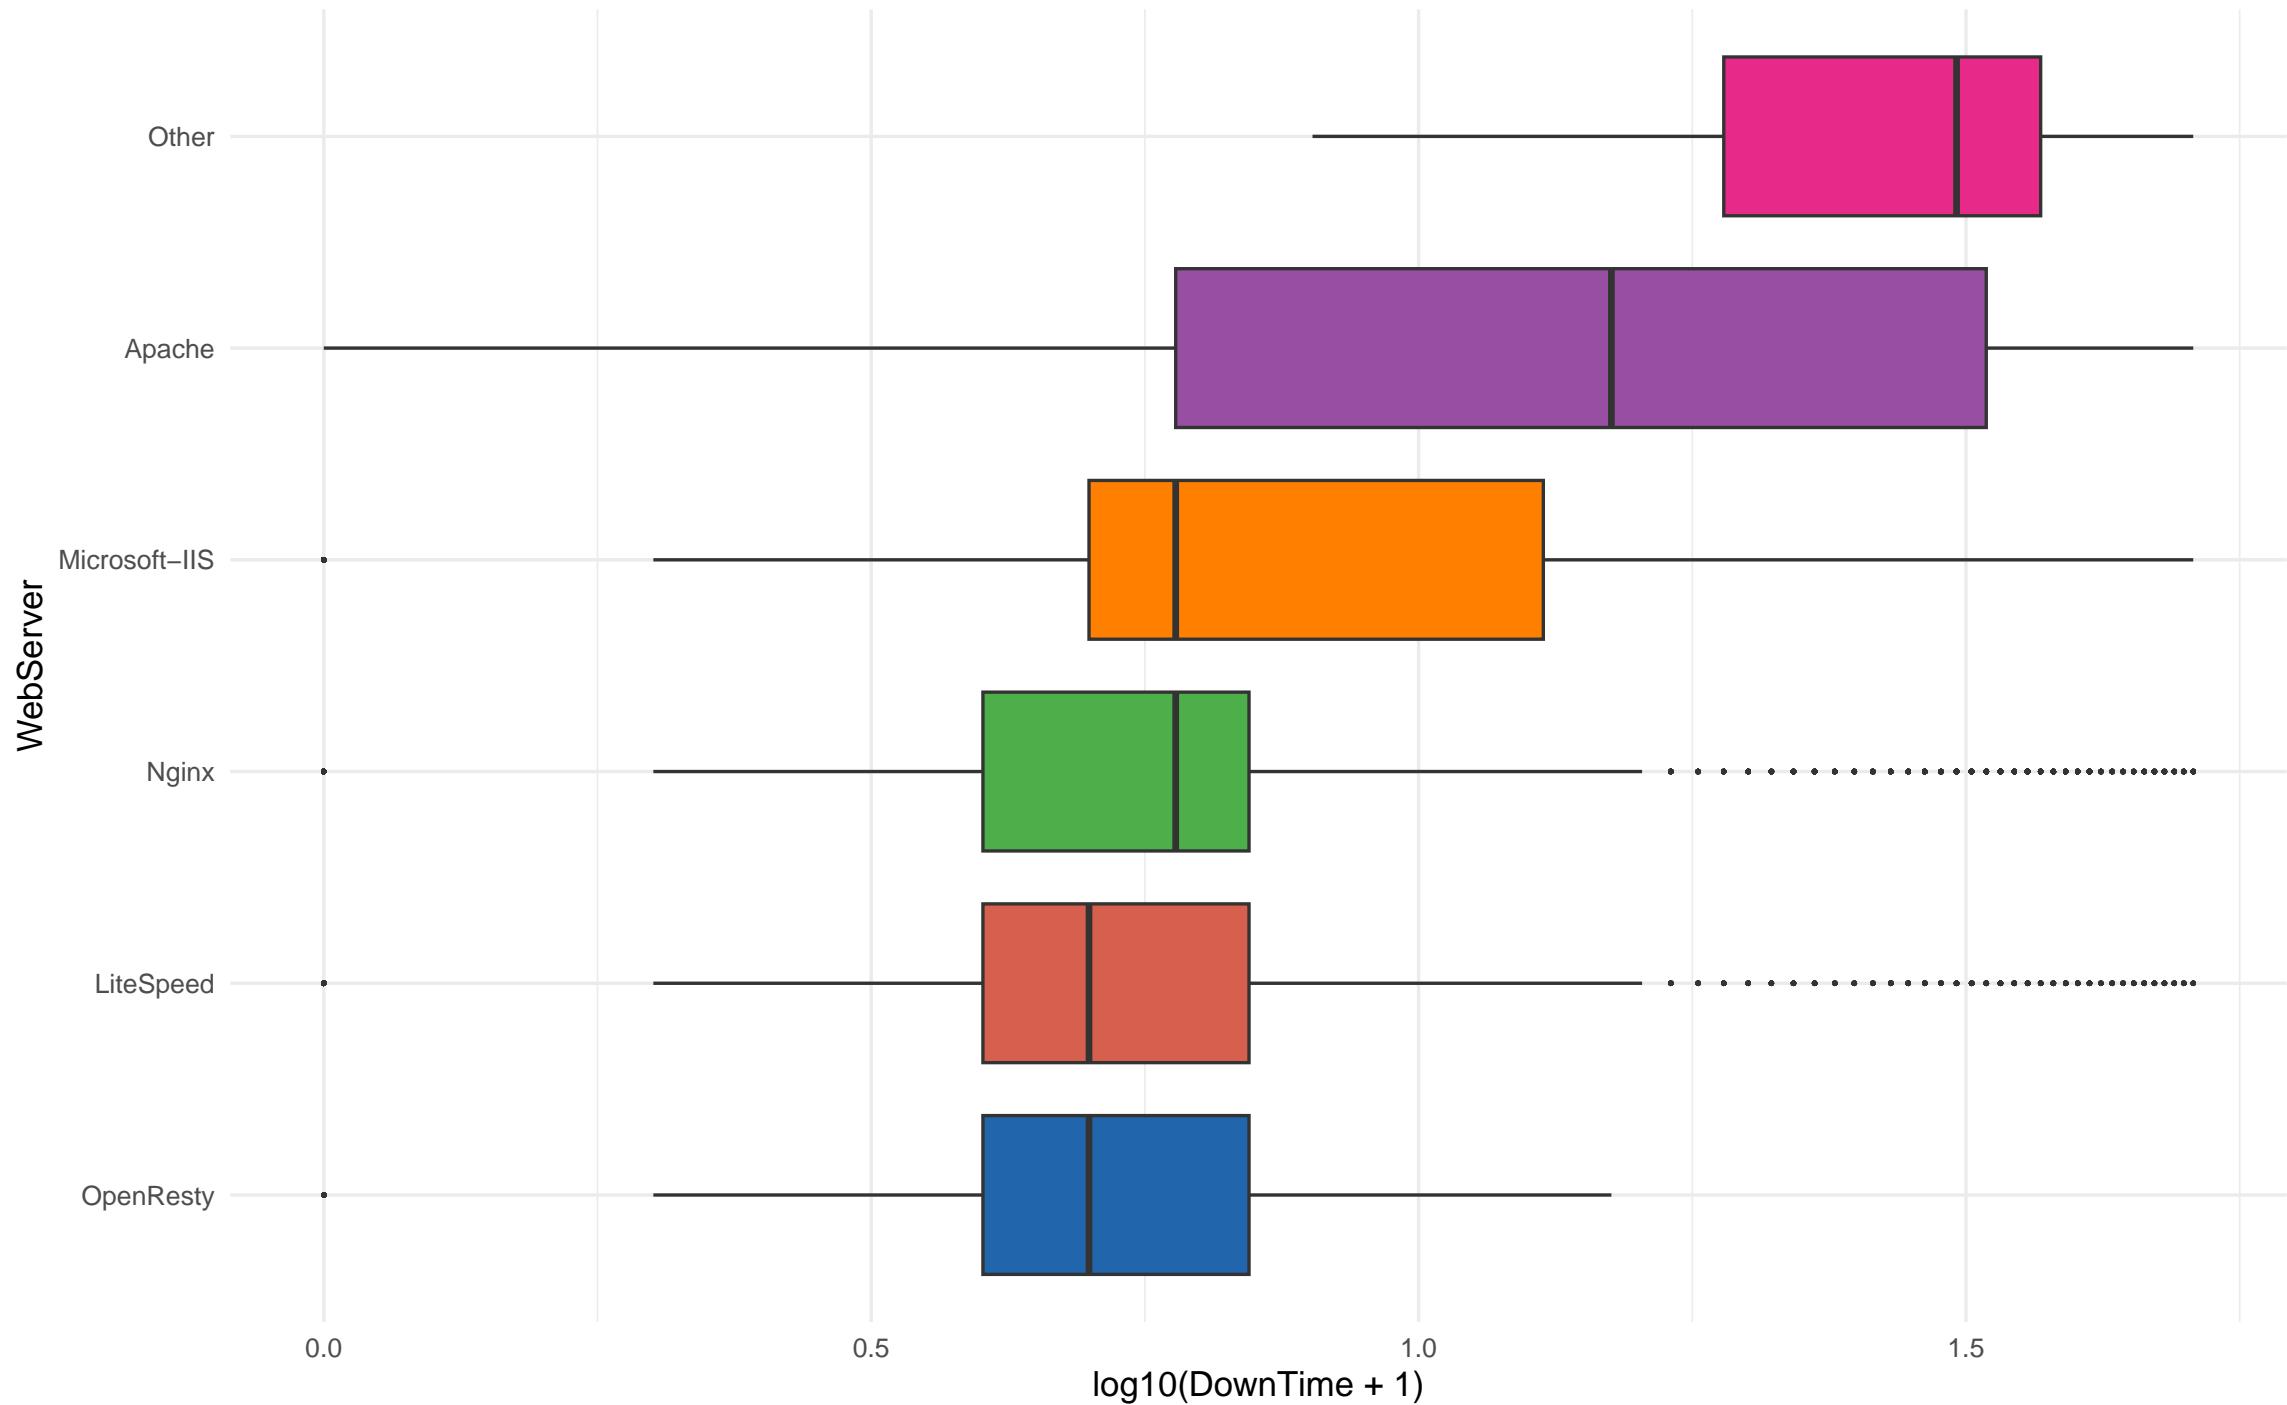

## RO2: Server DownTime by WebServer Type

Ordered by median downtime (descending) | Original scale (days)

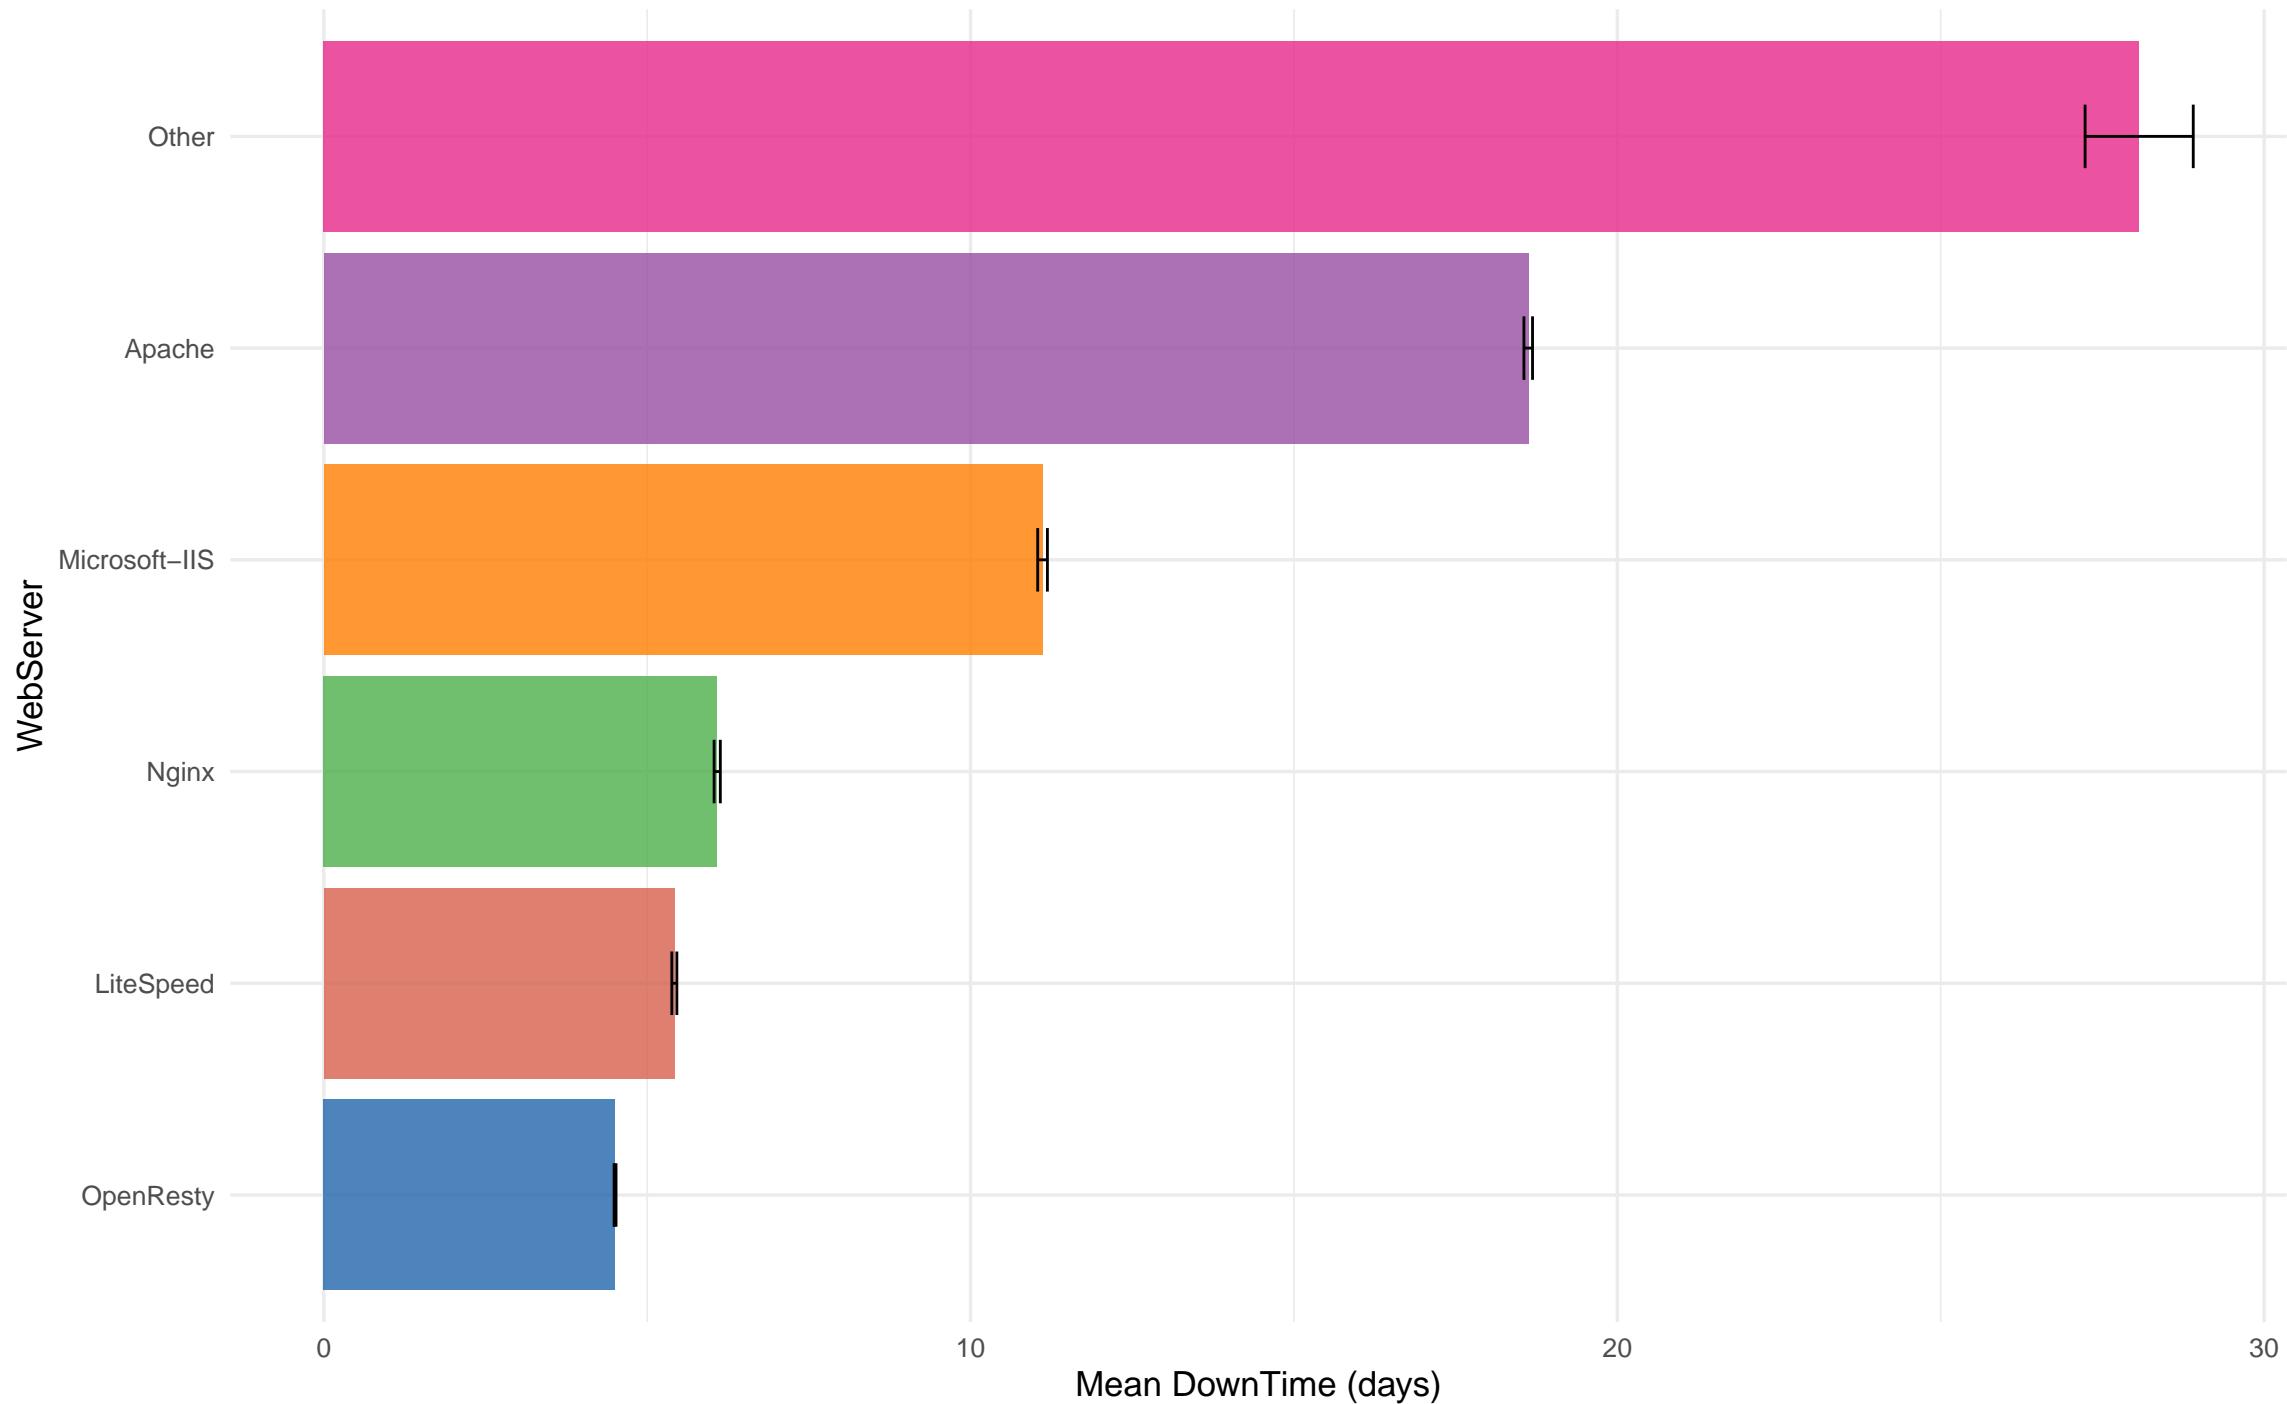

## RO2: Server DownTime by WebServer Type – Log Scale

$\log_{10}(\text{DownTime} + 1)$  | Better visualization of distribution spread

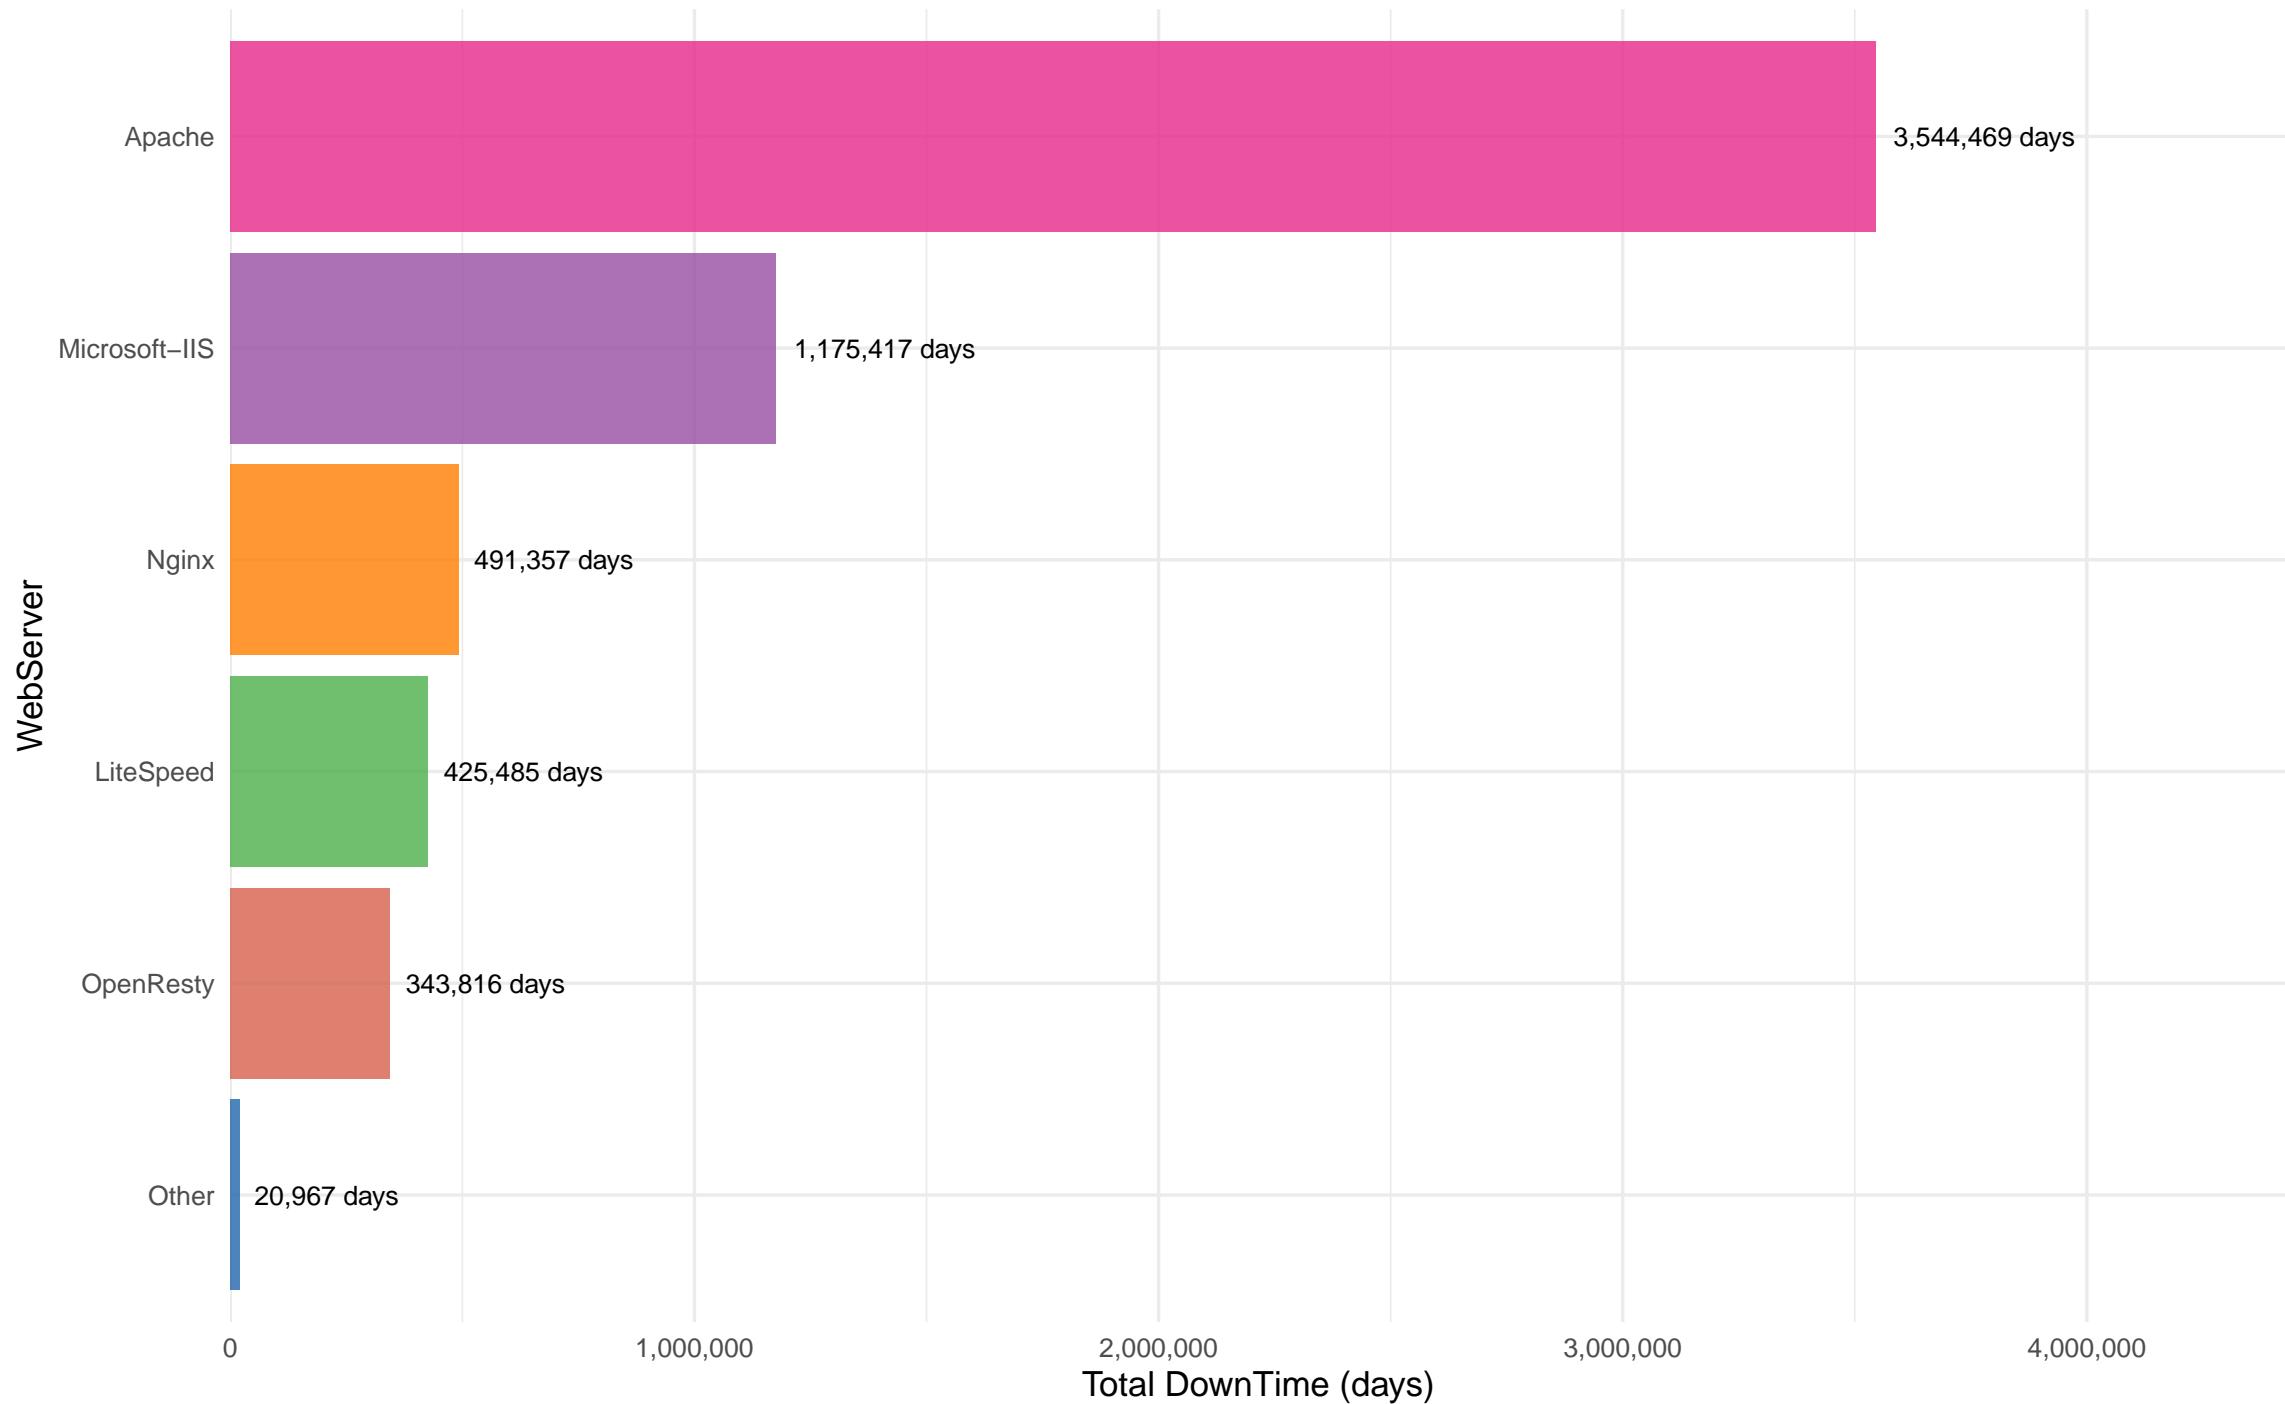

## RO2-Q1: Mean Server DownTime by WebServer Type

Which WebServer causes the longest average downtime? | 95% CI error bars

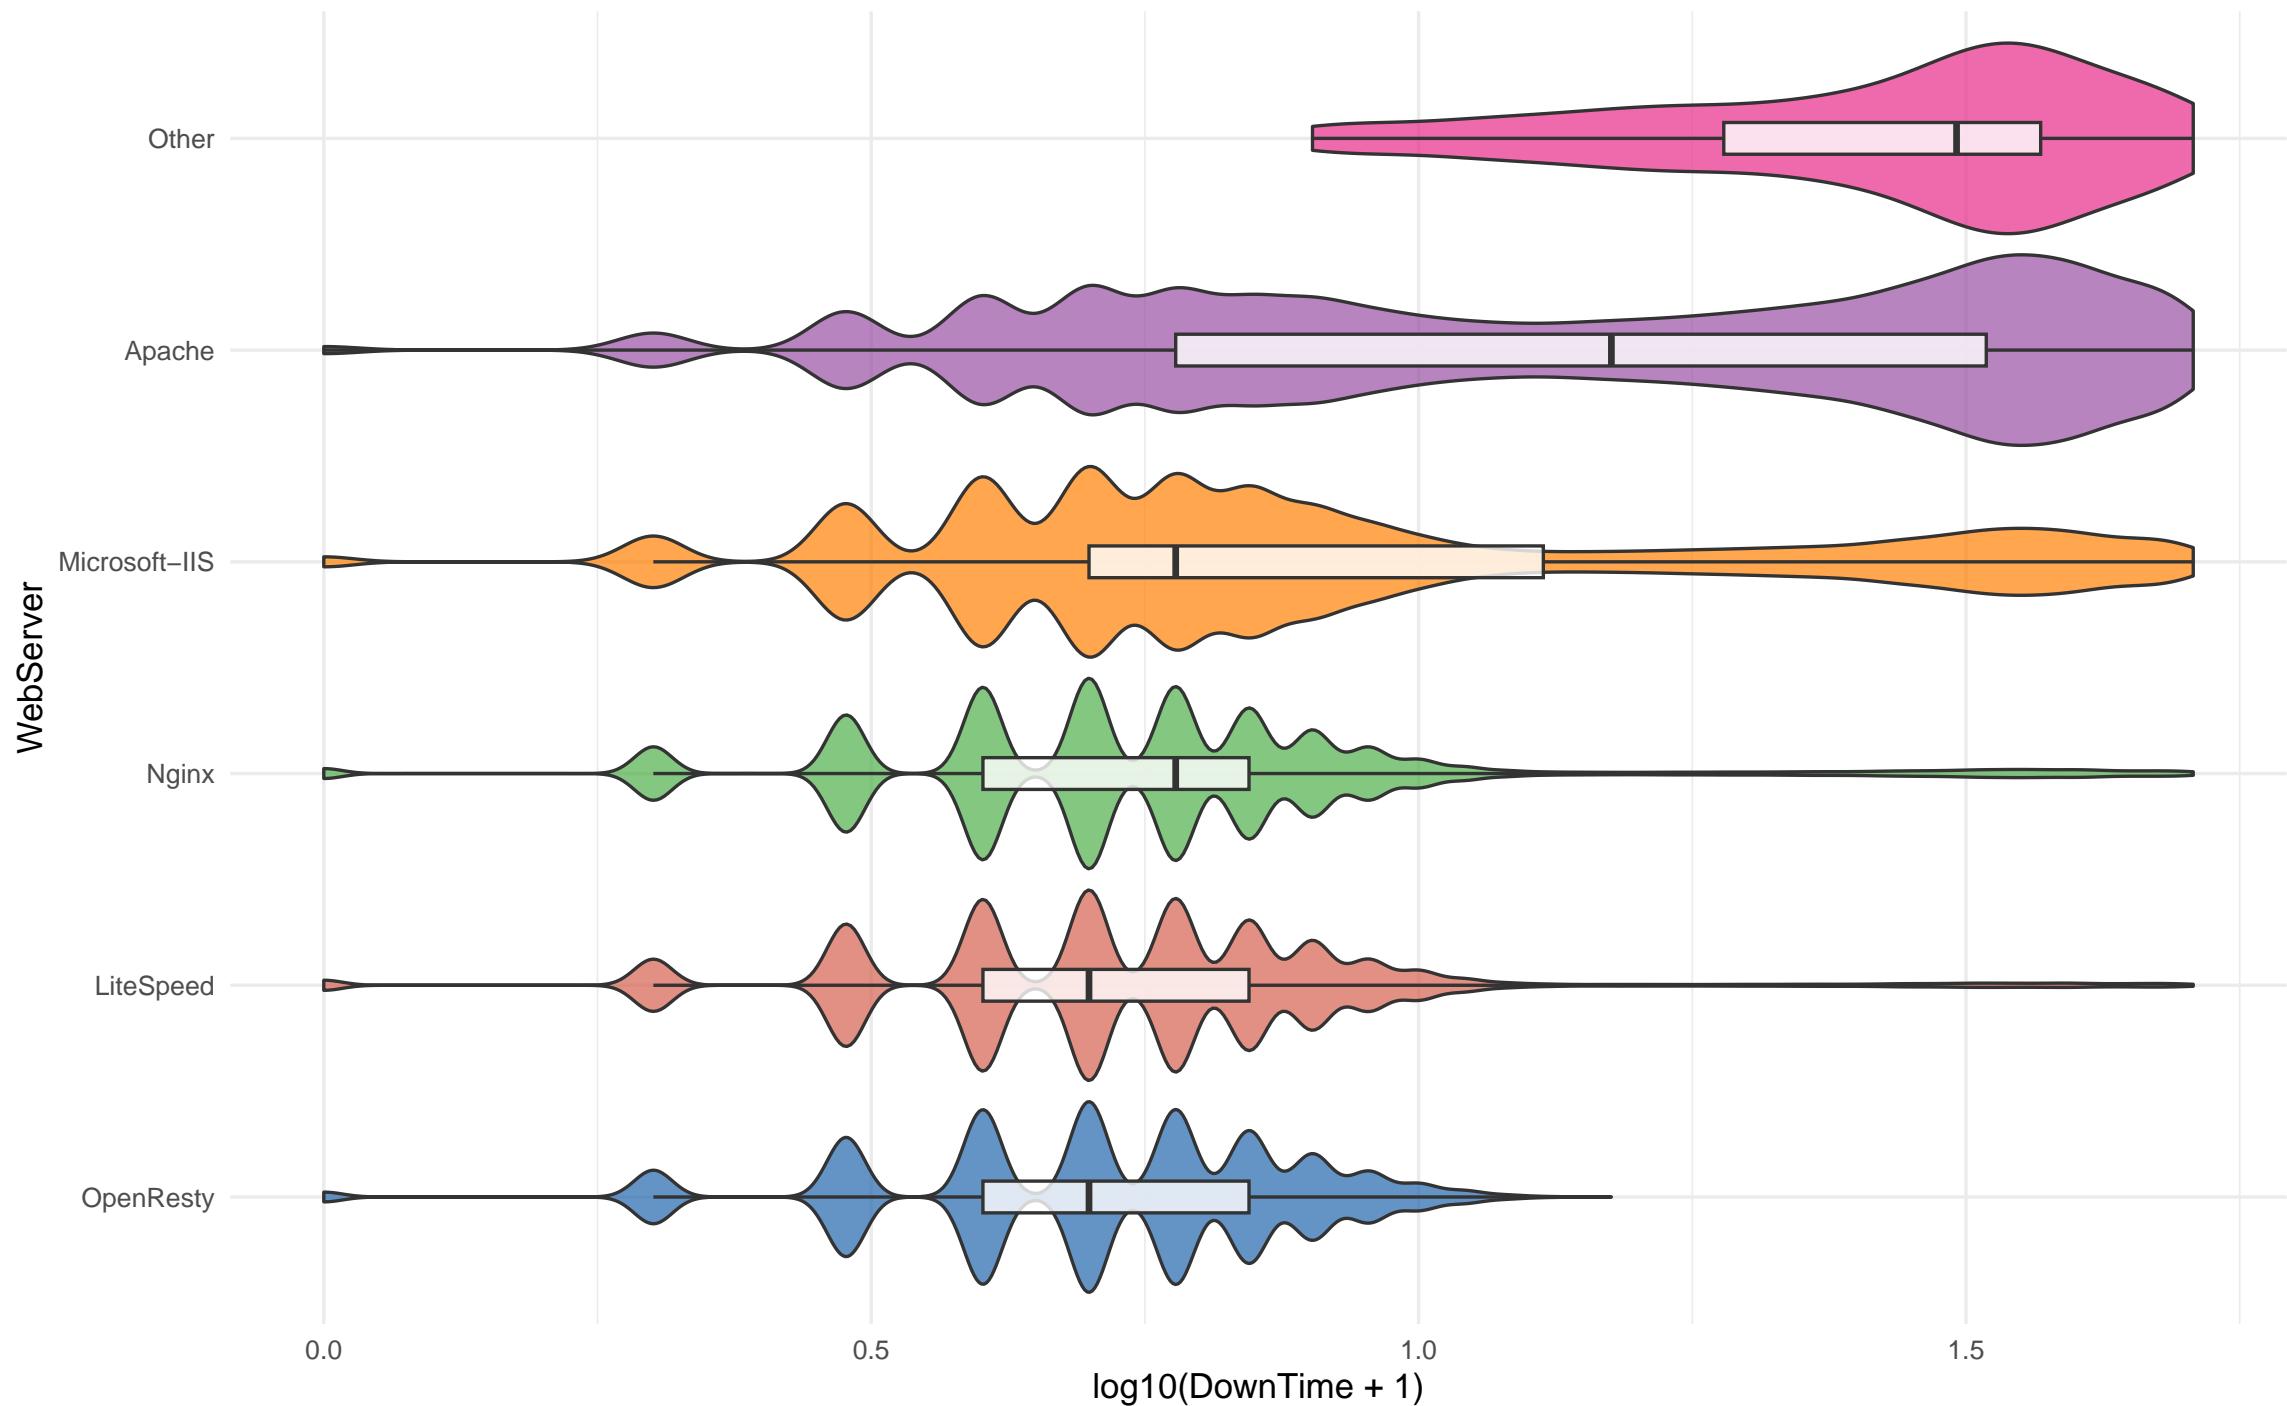

## RO2: Total Server DownTime by WebServer Type

Cumulative downtime across all incidents

## RO2: DownTime Distribution Shape by WebServer (Violin Plot)

$\log_{10}(\text{DownTime} + 1)$  | White boxes show IQR, line shows median

## RO2: Summary Statistics – DownTime by WebServer

WebServer	n	Mean	Median	SD	Min	Max	Total
Other	747	28.07	30	11.66	7	50	20,967
Apache	190,333	18.62	14	14.80	0	50	3,544,469
Microsoft-IIS	105,769	11.11	5	12.45	0	50	1,175,417
Nginx	80,777	6.08	5	6.97	0	50	491,357
LiteSpeed	78,502	5.42	4	5.54	0	50	425,485
OpenResty	76,342	4.50	4	2.12	0	14	343,816
